WEATHER KEY POINTS

08/09/21 - 08/15/21

Monday-Sunday

- One more day of slightly cooler temperatures is expected for inland areas today, before heat builds over much of interior southern California, the Central Valley, and northern valleys Wednesday onward through the weekend
 - Moderate to locally high heat risk impacts will become increasingly likely for interior areas of the state through the week
 - Note that temperatures closer to the coast will remain much cooler as winds remain onshore most days
- Fire weather conditions remain locally elevated most afternoons and evenings across the foothills and mountains where winds will occasionally gust 25 to 30 mph, though widespread strong winds are not expected over the next 7 days
- A few monsoon thunderstorms are possible over far southeast California this afternoon, with a gradual increase in coverage expected for southern portions of the state as well as the Sierra through mid and late week. A few storms are also possible across far northern California from late week into the weekend.
 - A few storms Tuesday could produce locally heavy rainfall over southern California
 - Lightning could pose a risk for some new fire starts, especially over the Sierra and northern California where any storms are less likely to produce locally heavier precipitation
- Periods of thicker wildfire smoke will persist across northern and central California through the week, bringing reduced visibility and air quality at times. Thicker smoke may also lead to locally cooler temperatures at times.
